

Garment Manufacturing Checklist

Essential Information for Garment Manufacturing

1. Design & Technical Details

- Sketches or CAD drawings showing garment details.
- Tech Pack with fabric details, trims, stitching, and color references.
- Reference samples (if available).

2. Pattern & Sample Requirements

- Production-ready patterns (if available) or request for pattern development.
- Sample development for fit and construction verification.
- Size range and grading specifications.

3. Fabric & Material Selection

- Fabric type and composition (client-supplied or sourced by us).
- Trims and accessories (buttons, zippers, labels, etc.).
- Sustainable material preferences (if applicable).

4. Production Volume & Timeline

- Order quantity per style, color, and size.
- Expected production timeline and deadlines.

5. Budget & Cost Considerations

- Target production cost per unit.
- Payment terms (deposit and final payment details).

6. Branding & Packaging

- Labels, tags, and branding elements.
- Packaging requirements (polybags, boxes, or sustainable packaging).

7. Shipping & Logistics

- Delivery location and shipping preferences.
- Freight and customs details for international orders.

How to Get Started

Garment Manufacturing Checklist

Once we receive these details, our team will:

- Review the design feasibility.
- Develop prototypes or samples if needed.
- Source materials and confirm fabric availability.
- Provide a production timeline and cost estimate.
- Begin manufacturing upon approval and deposit payment.
